

Introduction Video Script with Numbered Slides

- Slide 1.** Welcome to the first video of Washington State University's Pesticide Policy Training Modules. My name is Megan Miller and I work for the Washington State Pest Management Resource Service, or WSPRS, for short.
- Slide 2.** During these next few training modules I will describe the policy in general
- Slide 3.** Discuss your responsibilities as a WSU employee under this policy
- Slide 4.** Explain how the policy applies to Organic Systems
- Slide 5.** And cover Experimental Use Pesticides, also called EUP's.
- Slide 6.** First, let's go over how our training modules are set up. There will be three modules altogether. Each of the modules—the overview, organic systems, and EUP's—will have its own page with corresponding resources. Again Module 1 is the Overview, Module 2 is Organic Systems and Module 3 is Experimental Use Pesticides.
- Slide 7.** The first module's resources will include 2 overview videos, then the next module will have three organic systems videos and finally, the third module, will have three EUP videos. All will have podcasts, posts, and general information relating to the content of the training module.
- Slide 8.** As I said, each page will have a short description to introduce you to the topic, as well as training videos to further educate you. Underneath each video you'll find a PDF transcript in case you prefer a written copy.
- Slide 9.** For those of you who prefer to listen to a podcast, they be will posted on the same page, also with a transcript, for further reference.
- Slide 10.** Feel free to navigate these resources at your own pace!
- Slide 11.** Now that you know how our training modules are organized, let's get started! Begin with the next video, the "Overview of the Pesticide Policy and Your Responsibilities as a WSU Employee." Enjoy!
